MANAGER OF PHARMACY INFORMATICS

We are a growing regional medical center that is a leading premier healthcare provider in Western North Carolina. We are a very well respected and progressive non for profit healthcare system located just 2 hours east of Charlotte. We operate in a State of the Art Academic environment on a beautiful 90 acre hilltop campus. Our facilities are often ranked among some of the top facilities in the region. Our flagship hospital is the cornerstone of our network with 600+ beds, 6,500 employees, 750 Physicians and a free standing outpatient surgery center. This is a well-run, stable, secure working environment and this position will offer growth potential throughout the network.

Our beautiful community is located on the edge of the Appalachian Mountains. The surrounding area is a point of destination for many travelers right off the Blue Ridge Parkway. In recent years, it's been recognized for its splendors by dozens of magazines, Web sites and publications. In December 2008, Yahoo! Real Estate named our city as one of the top 10 places to live in the nation. The city has also received multiple accolades for its local arts, outdoor adventures, cuisine, organic and vegetarian eats, educational opportunities and much more. The New York Times calls it a "surprisingly cosmopolitan city."

Job Summary:
Responsible for the system-wide coordination of all medication use technology-based processes, including but not limited to: CPOE, e-MAR, unit-based cabinet dispensing, pharmacy-based packaging, dispensing, and compounding robotics, smart pump applications, and pharmacy system infrastructure supporting bar-coded bedside medication administration. Acts as consultant to Nursing and Clinical Informatics departments providing medication information for the development of integrated medication-related system functionalities. Acts as pharmacy representative to Information Technology department for planning and implementation of future enhancements/upgrades and patient care integration hardware and software.

Required Education: Bachelor's degree in Pharmacy with 3+ years information technology experience

Current licensure to practice pharmacy in any state - Preferred License: An active license to practice in North Carolina, or eligible to become licensed in North Carolina within 60 days
