# Xavier University Library 2017 Spring Documentary Film Festival

The Xavier University Library will host its first documentary film festival beginning January 2017. The documentary films chosen to be viewed are powerful, transformative, and deeply moving. With a global perspective towards cultural competency which highlight the sustainability of the human spirit, these films hope to inspire broad thinking and broad conversations. The films support a variety of academic disciplines, designed to strengthen and cultivate our relationship with the earth, each other and ourselves. A brief Q&A will follow each film. Thank you.
